Chronological Index

T01-001 Homogenization of Temperature-Dependent Thermal Conductivity in Composite Materials. Peter W. Chung and Kumar K. Tamma, *University of Minnesota*; and Raju R. Namburu, *U.S Army Research Laboratory* (**15**, 1, p. 10) ARTICLE based on AIAA Paper 99-0878

T01-002 Effective Thermal Conductivity and Thermal Contact Conductance of Graphite Fiber Composites. S. R. Mirmira, M. C. Jackson, and L. S. Fletcher, *Texas A&M University* (**15**, 1, p. 18) ARTICLE based on AIAA Paper 98-2760

T01-003 Prediction of Thermal Contact Conductance in Vacuum Using Monte Carlo Simulation. S. Sunil Kumar and K. Ramamurthi, *Liquid Propulsion Systems Centre, India* (**15**, 1, p. 27) ARTICLE

T01-004 Inverse Method for Estimating Thermal Conductivity in One-Dimensional Heat Conduction Problems. Jiin-Hong Lin, Cha'o-Kuang Chen, and Yue-Tzu Yang, *National Cheng-Kung University, Taiwan, ROC* (**15**, 1, p. 34) ARTICLE

T01-005 Investigation of the Temperature Distribution on Radiator Fins with Micro Heat Pipes. Y. X. Wang, *Texas A&M University*; H. B. Ma, *University of Missouri*; and G. P. Peterson, *Rensselaer Polytechnic Institute* (**15**, 1, p. 42) ARTICLE based on AIAA Paper 2000-0969

T01-006 Inertia and Thermal Convection During Crystal Growth with a Steady Magnetic Field. Nancy Ma, *University of Missouri–Rolla*; and John S. Walker, *University of Illinois at Urbana–Champaign* (**15**, 1, p. 50) ARTICLE

T01-007 Thermal Plume Turbulent Enhancement, Reverse Transition, and Relaminarization in Stably Stratified Enclosure. Katsuhisa Noto, Yoshiharu Meguro, and Tsuyoshi Nakajima, *Kobe University, Japan* (**15**, 1, p. 55) ARTICLE

T01-008 Statistical Thermodynamic Treatment of Multilayer Adsorption–Migration Kinetics. Michael C. Fong, *Lockheed Martin Missiles & Space* (**15**, 1, p. 64) ARTICLE based on AIAA Paper 98-2591

T01-009 Calculation of Transport Coefficients with Vibrational Nonequilibrium. D. Bruno, M. Capitelli, V. Cervellera, and S. Longo, *University of Bari, Italy*; and E. V. Kustova and E. A. Nagnibeda, *St. Petersburg University, Russia* (**15**, 1, p. 70) ARTICLE

T01-010 Chemical Kinetic Parameters of Hyperbolic Earth Entry. Chul Park, *Eloret Corporation*; and Richard L. Jaffe and Harry Partridge, *NASA Ames Research Center* (**15**, 1, p. 76) ARTICLE based on AIAA Paper 00-0210

T01-011 Computation of Hypersonic Radiating Flowfield over a Blunt Body. Takeharu Sakai, *National Research Council*; and Tomoko Tsuru and Keisuke Sawada, *Tohoku University, Japan* (**15**, 1, p. 91) ARTICLE based on AIAA Paper 99-0222

T01-012 Calculation of Nonequilibrium Radiation from a Blunt-Body Shock Layer. Takeharu Sakai, *National Research Council*; and Keisuke Sawada, *Tohoku University, Japan* (**15**, 1, p. 99) ARTICLE based on AIAA Paper 2000-0733

T01-013 Oxygen Atoms' Effect on Vibrational Relaxation of Nitrogen in Blunt-Body Flows. Eswar Josyula, *U.S Air Force Research Laboratory* (**15**, 1, p. 106) ARTICLE

T01-014 Integral Calculations of Melt-Layer Heat Transfer in Aerodynamic Ablation. Chin-Yi Wei, *National Cheng-Kung University, Taiwan, ROC*; and Tse-Fou Zien, *Naval Surface Warfare Center* (**15**, 1, p. 116) ARTICLE based on AIAA Paper 2000-0205

T01-015 Surface Temperature Diagnostics Using Infrared Multiwavelength Radiation Method. Wenhua Zhao, Kuo Tian, Shuguang Zhu, and Pin Lu, *Tsinghua University, PRC* (**15**, 1, p. 125) Technical Note

T01-016 Computational Algorithm for Thermodynamic Properties of Air to Extreme Temperatures and Pressures. C. Thames, D. Kelly, and J. E. Lyne, *University of Tennessee* (**15**, 1, p. 127) Technical Note

T01-017 Predictions of Ablating Hypersonic Vehicles Using an Iterative Coupled Fluid/Thermal Approach. David W. Kuntz, Basil Hassan, and Donald L. Potter, *Sandia National Laboratories* (**15**, 2, p. 129) ARTICLE

T01-018 Thermophysics Characterization of Kerosene Combustion. Ten-See Wang, *NASA Marshall Space Flight Center* (**15**, 2, p. 140) ARTICLE based on AIAA Paper 2000-2511

T01-019 Transport Coefficients for High-Temperature Nonequilibrium Air Flows. M. Fertig, *University of Stuttgart, Germany*; A. Dohr, *Technical University of Vienna, Austria*; and H. -H. Frühauf, *University of Stuttgart, Germany* (**15**, 2, p. 148) ARTICLE

T01-020 Vibration–Dissociation Coupling Using Master Equations in Nonequilibrium Hypersonic Blunt-Body Flow. Eswar Josyula, *U.S Air Force Research Laboratory*; and William F. Bailey, *Air Force Institute of Technology* (**15**, 2, p. 157) ARTICLE

T01-021 Entry Conditions in Planetary Atmospheres: Emission Spectroscopy of Molecular Plasma Arcjets. V. Lago, A. Lebéhot, and M. Dudeck, *Centre National de la Recherche Scientifique, France*; S. Pellerin, *Centre Universitaire de Bourges, France*; T. Renault, *Université de Limoges, France*; and P. Echegut, *Centre de Recherche sur les Matériaux à Huate Température, Centre National de la Recherche Scientifique, France* (**15**, 2, p. 168) ARTICLE

T01-022 Application of Planck–Rosseland–Gray Model for High-Enthalpy Arc Heaters. Takeharu Sakai, *National Research Council*; Keisuke Sawada, *Tohoku University, Japan*; and Masahiko Mitsuda, *Mechanical Engineering Research Laboratory, Japan* (**15**, 2, p. 176) ARTICLE based on AIAA Paper 98-2838

T01-023 Integral Form of the Radiative Transfer Equation Inside Refractive Cylindrical Media. Philippe Ben-Abdallah, *Université du Québec à Chicoutimi, Canada*; Sébastien Fumeron and Vital Le Dez, *Ecole Nationale Supérieure de Mécanique et d' Aérotechniques Chasseneuil du Poitou, France*; and André Charette, *Université du Québec à Chicoutimi, Canada* (**15**, 2, p. 184) ARTICLE

T01-024 Analysis of Ablation Characteristics of Absorbing Dielectrics Caused by Short Laser Pulses. Samuel George and Kunal Mitra, *Florida Institute of Technology* (**15**, 2, p.190) ARTICLE

T01-025 Heat Transfer Predictions Using a Dual-Dissipation k-ε Turbulence Closure. U. Goldberg and P. Batten, *Metacomp Technologies, Inc.* (**15**, 2, p. 197) ARTICLE; Errata (15,3, p. 376)

T01-026 Laminar Forced Convection Modeling of Isothermal Rectangular Plates. M. M. Yovanovich and P. Teertstra, *University of Waterloo, Canada* (**15**, 2, p. 205) ARTICLE

T01-027 Natural Convection in a Trapezoidal Enclosure with Offset Baffles. F. Moukalled, *American University of Beirut, Lebanon*; and S. Acharya, *Louisiana State University* (**15**, 2, p. 212) ARTICLE

T01-028 Effect of Void-Generated Thermocapillary Convection on Dopant Segregation in Microgravity Solidification. M. Kassemi, *NASA John H. Glenn Research Center at Lewis Field*; and M. Kaforey and D. Matthiesen, *Case Western Reserve University* (**15**, 2, p. 219) ARTICLE based on AIAA Paper 2000-0703

T01-029 Thermal Contact Conductance of Metal/Polymer Joints: An Analytical and Experimental Investigation. J. J. Fuller and E. E. Marotta, *Clemson University* (**15**, 2, p. 228) ARTICLE based on AIAA Paper 2000-0877

T01-030 Laser-Plasma Generator with Artificial Turbulence of the Input Gas Stream. Sergey T. Surzhikov, *Russian Academy of Sciences, Russia* (**15**, 2, p. 239) Technical Note based on AIAA Paper 2000-2631

T01-031 Statistical Heat Transfer from Uniform Annular Fins with High Thermal Conductivity Coating. Antonio Campo, *Idaho State University* (**15**, 2, p. 242) Technical Note

T01-032 Modified Collapsed Dimension Method for Radiative Heat Transfer Problems. P. Mahanta and Subhash C. Mishra, *Indian Institute of Technology, India* (**15**, 2, p. 246) Technical Note based on AIAA Paper 2000-0734

T01-033 Effect of Film-Hole Shape on Turbine-Blade Heat-Transfer Coefficient Distribution. Shuye Teng, *Heat Transfer Research, Inc.*; Je-Chin Han, *Texas A&M University*; and Philip E. Poinsatte, *NASA John H. Glenn Research Center at Lewis Field* (**15**, 3, p. 249) ARTICLE based on AIAA Paper 2000-1035

T01-034 Effect of Film-Hole Shape on Turbine-Blade Film-Cooling Performance. Shuye Teng, *Heat Transfer Research, Inc.*; Je-Chin Han, *Texas A&M University*; and Philip E. Poinsatte, *NASA John H. Glenn Research Center at Lewis Field* (**15**, 3, p. 257) ARTICLE

T01-035 Mass Transfer Distribution in Rotating, Two-Pass, Ribbed Channels with Vortex Generators. V. Eliades, D. E. Nikitopoulos, and S. Acharya, *Louisiana State University* (**15**, 3, p. 266) ARTICLE

T01-036 Heat Transfer in a Channel with Dimples and Protrusions on Opposite Walls. Gazi I. Mahmood, Mounir Z. Sabbagh, and Phillip M. Ligrani, *University of Utah* (**15**, 3, p. 275) ARTICLE

T01-037 Verification and Validation of Adaptive Finite Element Method for Impingement Heat Transfer. É. Turgeon and D. Pelletier, *École Polytechnique de Montréal, Canada* (**15**, 3, p. 284) ARTICLE

T01-038 Heat Transfer to the Inclined Trailing Wall of an Open Cavity. Orval A. Powell, *Air Force Research Laboratory*; and Jeffrey P. Bons, *Air Force Institute of Technology* (**15**, 3, p. 293) ARTICLE based on AIAA Paper 99-4889

T01-039 Gas-Surface Interaction Model Influence on Predicted Performance of Microelectromechanical System Resistojet. Andrew D. Ketsdever, *U.S.Air Force Research Laboratory*; Dean C. Wadsworth, *ERC, Inc.*; and E. P. Muntz, *University of Southern California* (**15**, 3, p. 302) ARTICLE based on AIAA Paper 2000-2430

T01-040 Self-Consistent Model of Chemical, Vibrational, Electron Kinetics in Nozzle Expansion. G. Colonna, ; and M. Capitelli, *University of Bari, Italy* (**15**, 3, p. 308) ARTICLE

T01-041 New Approach for Radiative-Transfer Computations in Axisymmetric Scattering Hot Media. Pierre-Emmanuel Baudoux, Antoine Roblin, and Patrick Chervet, *ONERA, France* (**15**, 3, p. 317) ARTICLE

T01-042 Enhancements of Nucleate Boiling and Critical Heat Flux Under Microgravity Conditions. Nengli Zhang, *Ohio Aerospace Institute*; David F. Chao, *NASA John H. Glenn Research Center at Lewis Field*; and W. J. Yang, *University of Michigan* (**15**, 3, p. 326) ARTICLE based on AIAA Paper 2000-0853

T01-043 Visualization of Flow Boiling in an Annular Heat Exchanger Under Microgravity Conditions. D. T. Westheimer, *Texas A&M University*; and G. P. "Bud" Peterson, *Rensselaer Polytechnic Institute* (**15**, 3, p. 333) ARTICLE

T01-044 Temperature Dependence of Thermophysical Properties of Disodium Hydrogenphosphate Dodecahydrate. Satoshi Hirano, *National Institute of Advanced Industrial Science and Technology, Japan*; Takeo S. Saitoh, *Tohoku University, Japan*; and Masaaki Oya and Masakazu Yamazaki, *National Institute of Advanced Industrial Science and Technology, Japan* (**15**, 3, p. 340) ARTICLE based on AIAA Paper 2000-2979

T01-045 Thermophysical Properties of High-Thermal-Conductivity Graphite Sheets for Spacecraft Thermal Design. H. Nagano, *Keio University, Japan*; A. Ohnishi, *Institute of Space and Astronautical Science, Japan*; and Y. Nagasaka, *Keio University, Japan* (**15**, 3, p. 347) ARTICLE based on AIAA Paper 2000-2510

T01-046 Thermal Spreading Resistances in Compound Annular Sectors. Y. S. Muzychka, M. Stevanovic´, and M. M. Yovanovich, *University of Waterloo, Canada* (**15**, 3, p. 354) ARTICLE based on AIAA Paper 2000-0875

T01-047 Composite Lumped Model and Algebraic Solutions of Unsteady Temperatures and Accumulated Heat Transfer. Antonio Campo, *Idaho State University* (**15**, 3, p. 360) ARTICLE

T01-048 Pool Film-Boiling Heat Transfer from a Horizontal Downward-Facing Surface. Djati Walujastono, Toshinori Okuda, and Kouichi Kamiuto, *Oita University, Japan* (**15**, 3, p. 368) Technical Note

T01-049 Positivity of Entropy Production and Phase Density in the Chapman-Enskog Expansion. Henning Struchtrup, *Arizona State University, Canada* (**15**, 3, p. 372) Technical Note

T01-050 Resolution of Magnetogasdynamic Phenomena Using a Flux-Vector Splitting Method. Patrick W. Canupp, *Air Force Research Laboratory* (**15**, 3, p. 373) Technical Note

T01-051 Experimental and Computational Study of Infared Emission from Underexpanded Rocket Exhaust Plumes. J. Stricker and M. Lev, *Technion—Israel Institute of Technology, Israel*; and G. Avital, Y. Cohen, L. Gamss, Y. Kanelbaum, J. Macales, and B. Trieman, *Israel Military Industries Ltd. (IMI), Israel;* A. Sternlieb, *DDR&D/IMOD* (**15**, 4, p. 377) ARTICLE

T01-052 Investigation on the Effects of Body Force Environment on Flat Heat Pipes. M. C. Zaghdoudi, *ATHERM, France*; and C. Sarno, *Sextant Avionique, France* (**15**, 4, p. 384) ARTICLE

T01-053 Experimental Investigation of Oscillating Heat Pipes. Lanchao Lin, *UES, Inc.*; Rengasamy Ponnappan and John Leland, *Air Force Research Laboratory* (**15**, 4, p. 395) ARTICLE based on AIAA Paper 2000-2948

T01-054 Experimental Evaluation of Triangular Microgrooved on a Condensing Surface. Rodolfo Barron-Jimenez, *Texas A&M University*; and G. P. Peterson, *Rensselaer Polytechnic Institute* (**15**, 4, p. 401) ARTICLE based on AIAA Paper 2000-0965

T01-055 Two-Phase Pressure Drop of Air–Water in Small Horizontal Tubes. Ing Youn Chen and Kai-Shing Yang, *National Yunlin University of Science and Technology, Taiwan, ROC*; and Chi-Chung Wang, *Energy & Resources Laboratories Industrial Technology Research Institute, Taiwan, ROC* (**15**, 4, p. 409) ARTICLE based on AIAA Paper 2001-1046

T01-056 Effects of Evaporation and Thermocapillary Convection on Spreading and Contact Angle of Volatile Liquid Droplets. David F. Chao, *NASA John H. Glenn Research Center at Lewis Field*; and Nengli Zhang, *Ohio Aerospace Institute* (**15**, 4, p. 416) ARTICLE

T01-057 Comparison of Standard and Heat-Pipe Fins with Specified Tip Temperature Condition. W. Jerry Bowman and Daniel Maynes, *Brigham Young University* (**15**, 4, p. 421) ARTICLE

T01-058 Thermally Asymmetric Triangular Fin Analysis. H. S. Kang, *Kangwon National University, Korea*; and D. C. Look Jr., *University of Missouri-Rolla* (**15**, 4, p. 427) ARTICLE

T01-059 Influence Functions for the Infinite and Semi-Infinite Strip. Kevin D. Cole, *University of Nebraska*; and David H. Y. Yen, *Michigan State University* (**15**, 4, p. 431) ARTICLE

T01-060 Three-Dimensional Inverse Estimation of Heat Generation in Board Mounted Chips. Cheng-Hung Huang and Shun-Chung Cheng, *National Cheng-Kung University, Taiwan, ROC* (**15**, 4, p. 439) ARTICLE

T01-061 Theoretical and Experimental Analysis on Thermoelectric Cooling Devices. Michele Anatone and Roberto Cipollone, *University of L'Aquila, Italy* (**15**, 4, p. 447) ARTICLE

T01-062 Analysis of a Single-Layer Thermophotovoltaic System at Moderate Temperatures. Linda Z. Shi, Spencer Y. Xu, and R. F. Boehm, *University of Nevada* (**15**, 4, p. 453) ARTICLE

T01-063 Performance of Multilayered Thermophotovoltaic Elements at Moderate Temperature. Linda Z. Shi and R. F. Boehm, *University of Nevada* (**15**, 4, p. 458) ARTICLE

T01-064 Drag Model for Free Molecule Flow. John F. Belena, *Mississippi State University*; and Z.U.A. Warsi, *Mississippi State University,* (**15**, 4, p. 463) ARTICLE

T01-065 Microfilter Simulations and Scaling Laws. David R. Mott, Elaine S. Oran, and Carolyn R. Kaplan, *U.S Naval Research Laboratory* (**15**, 4, p. 473) ARTICLE

T01-066 Molecular Dynamics Simulation of Dissociation Kinetics. Andrew L. Kantor, Lyle N. Long, and Michael M. Micci, *Pennsylvania State University* (**15**, 4, p. 478) ARTICLE based on AIAA Paper 2000-0213

T01-067 Emission and Raman Spectroscopy Measurements in Hypersonic Nitrogen Flows. H. Pilverdier, R. Brun, and M. P. Dumitrescu, *Université de Provence, France* (**15**, 4, p. 484) ARTICLE

T01-068 Shock Propagation Through a Low-Pressure Glow Discharge in Argon. A. R. White and V. V. Subramaniam, *The Ohio State University* (**15**, 4, p. 491) ARTICLE

T01-069 Variable Property Piston Effect. Howard Wagner, Pascal Hos, and Yildiz Bayazitoglu, *Rice University* (**15**, 4, p. 497) ARTICLE
